## **KOLIBRI GLOBAL ENERGY INC. ISSUES 2022 UPDATE**

**Newbury Park, CALIFORNIA, July 20, 2022** – Kolibri Global Energy Inc. (the “**Company**” or “**KEI**”) (TSX: KEI, OTCQB: KGEIF) is pleased to provide an update on its board of directors and its operations located in the Company’s Tishomingo field in Oklahoma.

### Election of Evan Templeton

Evan Templeton was elected as a new director at the annual general meeting held on July 19, 2022. Mr. Templeton brings over 25 years of financial experience to the Company. His financial career has focused primarily on the High Yield and Leveraged Loan markets as a Senior Credit Analyst covering the Exploration & Production, Midstream, Oilfield Services and Refining sectors. He is the Founder and principal of WestOak Advisors, LLC which provides capital markets services to middle-market public and private companies. He is also a Managing Director at Odinbrook Global Advisors, LLC, which provides advisory services to companies in transition or financial distress. Prior to his current roles, Mr. Templeton was a Managing Director in the Leveraged Credit Trading group at Jefferies, where he led the Strategy Group. Prior to Jefferies, he held similar roles at RBC Capital Markets and FleetBoston Robertson Stephens. Mr. Templeton played key roles in the diligence, structuring and marketing of over \$20 billion of left-lead high yield and leveraged loan transactions.

Wolf Regener, President, and CEO commented, “We are very pleased to have someone with Evan’s wealth of experience and expertise join our team. We believe that Evan will bring a tremendous benefit to our Company and its shareholders. We welcome Evan to our Board of Directors.”

### OPERATIONS

The Company has completed the location work for the subsequent two wells in its 2022 drilling program. The drilling rig for the Glenn 16-3H and Brock 9-3H wells is expected to arrive on location around the first week of August. The wells will be drilled back to back, and the completion operations for both wells have been scheduled for mid-September. The fifth well in the 2022 drilling program is anticipated to be drilled shortly after the Glenn 16-3H and Brock 9-3H wells.

Wolf Regener, President, and CEO commented, “I am excited that we will be continuing our 2022 drilling program shortly and that the Barnes 7-3H and Barnes 8-4H wells are performing as anticipated. The new wells have significantly increased our second quarter cash flow and adjusted funds flow. We are currently on target to meet or exceed our previously announced financial guidance. This guidance has the Company exiting the year with production rates that are about three times higher than the beginning of the year, with an annual adjusted funds flow

that is about four times higher than what we achieved in 2021, and a total debt to EBITDA ratio at year-end of less than 1.0.”

## NON-GAAP MEASURES

Adjusted funds flow is not a measure recognized under Canadian generally accepted accounting principles ("GAAP") and does not have any standardized meaning prescribed by IFRS. Management of the Company believes that adjusted funds flow is relevant for evaluating returns on each of the Company's projects as well as the performance of the enterprise as a whole. Adjusted funds flow may differ from similar computations as reported by other similar organizations and, accordingly, may not be comparable to similar non-GAAP measures as reported by such organizations. Adjusted funds flow should not be construed as an alternative to net income, cash flows related to operating activities, working capital or other financial measures determined in accordance with IFRS, as an indicator of the Company's performance.

An explanation of how adjusted funds flow provides useful information to an investor and the purposes for which the Company's management uses adjusted funds flow is set out in the management's discussion and analysis under the heading "Non-GAAP Measures" which is available under the Company's profile at [www.sedar.com](http://www.sedar.com) and is incorporated by reference into this earnings release.

The following is the reconciliation of adjusted funds flow to the comparable financial measures disclosed in the Company's financial statements:

(US \$000)	Three months ended March 31,	
	2022	2021
Cash flow from continuing operations	1,243	1,364
Change in non-cash working capital	1,381	(64)
Interest expense <sup>(a)</sup>	198	209
Adjusted funds flow	2,822	1,509

(a) Interest expense on long-term debt excluding the amortization of debt issuance costs

## About Kolibri Global Energy Inc.

### **Cautionary Statements**

*In this news release and the Company's other public disclosure: The references to barrels of oil equivalent ("Boes") reflect natural gas, natural gas liquids and oil. Boes may be misleading, particularly if used in isolation. A Boe conversion ratio of 6 Mcf:1 Bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value. Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. There is a 10% probability that the quantities actually recovered will equal or exceed the sum of proved plus probable plus possible reserves. The type curve utilized by the Company's management is the average of the 7 Caney wells that are located in the Corridor (well names can be found on the Company's Corporate presentation), with lateral lengths normalized to a 4,900 ft lateral length, the other assumptions are the same as in the Company's December 31, 2021 independent reserves evaluation.*

*Readers should be aware that references to initial production rates and other short-term production rates are preliminary in nature and are not necessarily indicative of long-term performance or of ultimate recovery. Readers are referred to the full description of the results of the Company's December 31, 2021 independent reserves evaluation and other oil and gas information contained in its Form 51-101F1 Statement of Reserves Data and Other Oil and Gas Information for the year ended December 31, 2021, which the Company filed on SEDAR on March 8, 2022.*

### **Caution Regarding Forward-Looking Information**

*Certain statements contained in this news release constitute "forward-looking information" as such term is used in applicable Canadian securities laws and "forward-looking statements" within the meaning of United States securities laws (collectively, "forward looking information"), including statements regarding the benefit Evan will bring to the Company and shareholders, the timing and expected funding sources of, and expected results from, planned wells development, projected total capital program budget for all five of the Company's 2022 wells, the drilling rig arriving on location around the first week of August, completion operations for both wells scheduled for mid-September, the timing of drilling of the 5<sup>th</sup> well in the 2022 program, and forecasted production rates, revenue, adjusted funds flow and net debt to EBITDA ratio.*

*Forward-looking information is based on plans and estimates of management and interpretations of data by the Company's technical team at the date the data is provided and is subject to several factors and assumptions of management, including \$90 a barrel oil price, \$6 Henry Hub and NGL pricing of \$36 bbl, cost inflation of over 20% for the three remaining wells planned for 2022, that the drilling rig will become available, the drilling rig arriving on location around the first week of August, completion operations for both wells occurring in mid-September, the 5<sup>th</sup> well in the 2022 drill program being drilled shortly thereafter, that required regulatory approvals will be available when required, that no unforeseen delays, unexpected geological or other effects, including flooding and extended interruptions due to inclement or hazardous weather conditions, equipment failures, permitting delays or labor or contract disputes are encountered, that the necessary labor and equipment will be obtained, that the development plans of the Company and its co-venturers will not change, that the offset operator's operations will proceed as expected by management, that the demand for oil and gas will be sustained, that the price of oil will be sustained or increase, that the Company will continue to be able to access sufficient capital through cash flow, debt, financings, farm-ins or other participation arrangements to maintain its projects, and that global economic conditions will not deteriorate in a manner that has an adverse impact on the Company's business, its ability to advance its business strategy and the industry as a whole.*

*Forward-looking information is subject to a variety of risks and uncertainties and other factors that could cause plans, estimates and actual results to vary materially from those projected in such forward-looking information. Factors that could cause the forward-looking information in this news release to change or to be inaccurate include, but are not limited to, the risk that any of the assumptions on which such forward*

*looking information is based vary or prove to be invalid, including that the Company or its subsidiaries is not able for any reason to obtain and provide the information necessary to secure required approvals or that required regulatory approvals are otherwise not available when required, that unexpected geological results are encountered, that equipment failures, permitting delays, labor or contract disputes or shortages of equipment or labor or materials are encountered, the risks associated with the oil and gas industry (e.g. operational risks in development, exploration and production; delays or changes in plans with respect to exploration and development projects or capital expenditures; the uncertainty of reserve and resource estimates and projections relating to production, costs and expenses, and health, safety and environmental risks, including flooding and extended interruptions due to inclement or hazardous weather conditions), the risk of commodity price and foreign exchange rate fluctuations, that the offset operator's operations have unexpected adverse effects on the Company's operations, that completion techniques require further optimization, that production rates do not match the Company's assumptions, that very low or no production rates are achieved, that the price of oil will decline, that the Company is unable to access required capital, that occurrences such as those that are assumed will not occur, do in fact occur, and those conditions that are assumed will continue or improve, do not continue or improve, and the other risks and uncertainties applicable to exploration and development activities and the Company's business as set forth in the Company's management discussion and analysis and its annual information form, both of which are available for viewing under the Company's profile at [www.sedar.com](http://www.sedar.com), any of which could result in delays, cessation in planned work or loss of one or more concessions and have an adverse effect on the Company and its financial condition. The Company undertakes no obligation to update these forward-looking statements, other than as required by applicable law.*

**Caution Regarding Future-Oriented Financial Information and Financial Outlook**

*This news release may contain information deemed to be "future-oriented financial information" or a "financial outlook" (collectively, "FOFI") within the meaning of applicable securities laws. The FOFI has been prepared by management to provide an outlook of the Company's activities and results and may not be appropriate for other purposes. The FOFI has been prepared based on a number of assumptions including the assumptions discussed above under "Caution Regarding Forward-Looking Information". The actual results of operations of the Company and the resulting financial results may vary from the amounts set forth herein, and such variations may be material. The Company and management believe that the FOFI has been prepared on a reasonable basis, reflecting management's best estimates and judgments. FOFI contained in this news release was made as of the date of this news release and the Company disclaims any intention or obligations to update or revise any FOFI contained in this news release, whether as a result of new information, future events or otherwise, unless required pursuant to applicable law.*
